Priority number(s):

Abstract of JP3024684

PURPOSE: To expand the using range of a prepaid card and to make a device portable by providing the device with a means for reading the contents of the prepaid card and displaying its balance and a means for issuing a ticket of amount corresponding to an inputted destination.

CONSTITUTION: At the time of selling a ticket in a vehicle, a CPU 10 decides whether the ticket is paid by cash or a prepaid card. At the time of using the card, the CPU 10 reads out the current card balance and displays the read balance on a liquid crystal display part 4. When an input operation key in a keying part 2 is depressed, characters displayed on the display part 4 are erased and the number of the depressed key is displayed on the display part 4. Then a ticket is printed out and issued. Then the current input data are added to an issue history RAM 9.
